PROFILE

My desire to learn new technologies has led me to the 12-week intensive self-funded _nology course. I am now looking for a challenging role in the tech industry where I can build on the skills I have been honing.

EXPERIENCE

JUNIOR SOFTWARE DEVELOPER

_NOLOGY | 2020 -

Project based intensive training course, involving the development of a prototype web application for an external client using React.js . While working on briefs and personal projects all built of a strong foundation of web fundamentals.

Agile working environment, working to sprints with daily stand ups and weekly retrospectives. Experience in Test Driven Development using Jest and Enzyme. Created applications using Firebase for authentication and no SQL database.

OPERATIONS MANAGER

FREESTYLEXTREME | 2015 - 2019

I coordinated the concise administration, smooth inbound and outbound operations of the online retailers warehouse. I restructured workflow daily delivering and exceeding targets while slashing previous wastage. I orchestrated internal reviews which introduced key performance indicators for the staff, maximizing productivity and furthered a positive work culture.

I pioneered the standardisation of training, workload management and task delegation by implementing accessible and adaptable cloud based computing systems.
